

PREFINISHED BOARDS

STAINED IN 8 TRENDY COLOURS

READY TO USE

Aranya is a concept in veneered boards which combines economy and ecology: all components of Aranya are chosen because of their fully proven neutral impact on the environment. Furthermore the production of Aranya is planned on an industrial scale and guarantees the highest standards of quality for a most competitive price. Aranya is, as well, synonym of beauty: high quality veneer stained in 8 trendy colours that will bring the perfect atmosphere to your creations. Aranya is the panel of the 21st century, the board of the future, the ultimate solution regarding veneered boards.

Finally, concern for environment is designed into Aranya. Veneer is already environmentally friendly by nature as valuable wood is sliced in thin layers and represents less than 5% of the final volume of a board. But Aranya goes even further as all its components, veneer and coreboard, are PEFC certified and all the glues used in the production process are free of formaldehyde.

Joining pattern	Selection of quarter and false quarter oak or walnut crown cut, jointed in mixmatch
Size	2750 x 1220 mm
Coreboard	MDF pure (MDF without added formaldehyde)
